

## **Tirymynach Business Plan 2023/2024**

As a Community Council, our purpose is to serve the local community with our priorities being the Health, well-being, and Safety of the Community.

To this end, our priorities in the forthcoming year are;-

To develop the community park spaces adjacent to Bryncastell & Tregerddan estates. In order to undertake this, we will engage with relevant parties including The Welsh Government, Woodland Trust and Local Businesses to develop the spaces to be accessible to all, to provide a safe space for children to play and to provide a welcoming and peaceful outdoor space for all the community. We will explore possibilities of natural planting and whether the spaces can offer the opportunity for the local population to plant a few of the trees gifted to each household under the Welsh Government Jubilee scheme in 2022.

In order to consider the health and safety of the Community, the Council has taken responsibility for ensuring the defibrillators already situated in the community, outside the Village Hall, The Spar & Noddfa Chapel are well maintained and we are exploring the possibility of a defibrillator to be placed in the Llangorwen area.

A further objective is to engage with The County Council to explore the possibility of further waste bins strategically placed within the community to reduce the problem of dog mess and rubbish in public areas.

The Community Council is also keen to develop opportunities to encourage greater community engagement in these plans and encourage feedback from the community on priority needs. To this end, we are developing a website to share information and are also exploring further opportunities for community engagement.

In our efforts to improve the park spaces, we will have to use monies from the precept allowed by The County Council. However in order to reduce cost to the

community we will be identifying and applying for appropriate grants to increase the available budget for these.
